Jason King
NV

Dear King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

It's important for me that the Great Basin water stays in the Great Basin because of the personal experience that I have of the area. I love hiking at Great Basin National Park. I have also ridden my bike with panniers across the entire state of Nevada. We rode right through this area. It is beautiful now, but would be entirely depleted if it lost its groundwater.

Please save the way of life of the inhabitants, both human and animal, of this area. And save it for admiring visitors like me.

I urge you to deny the applications filed by the Southern Nevada Water Authority and support the best interests of all of Nevada.

Sincerely,

Dr. Carolyn Clark
