State Engineer Jason King
NV

Dear State Engineer Jason King State Engineer King,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Dear State Engineer Jason Keith,
The families and small businesses of Las Vegas do not need the huge price of this project. In addition Nevada does not need an "Owen's Valley". We have to protect water where it is. Stealing water drom White Pine and Lincoln is a crime. When that water is gone where will you look next, the Columbia River? It is time for Southern nevada to tighten your water belts and make better use of the water you have.

Sincerely,

Marian Conrad
