State Engineer Jason King, State Engineer
NV

Dear State Engineer Jason King State Engineer King, State Engineer,

We believe the scientific information is overwhelming: Draining 50 billion gallons of groundwater from the Great Basin would devastate Native American communities, rural economies and wildlife habitat over a huge area.

Further, the families and small businesses of Las Vegas, recovering from a brutal recession, cannot afford the huge price tag for this project.

Mr King,

This \$15 billion pipeline is a foolish and costly "solution" to the southern Nevada water issues. This \$ is much better spent on alternative and less invasive "solutions" of which there are many. We can solve our water problems in southern Nevada without robbing (and altering) the Great Basin region of White Pine and Lincoln counties.

Sincerely and Seriously,
Mark Limage
