Carson City, NV 89701

Subject: A 300-Mile Pipeline is Not the Answer.

Dear Jason King,

Great Basin National Park is an extraordinary place--remote, scenic, and treasured by millions of Americans who value our national park system. Plans to pump millions and millions of gallons from the park's vast ecosystem greatly threaten what is special about this place.

I appeal to you, Mr. King, to dismiss questionable, ecologically-unsound plans to pump and move water from one location in Nevada more than 300 miles to Las Vegas. I appeal to you to respect Nevada's sole national park and make certain the park's resources are sustained for generations to come.

I am a resident of Las Vegas, and am appalled by the blatant disregard that the Las Vegas Valley Water District, as well as the County, that is responsible for construction permits, has had for the fact that this is a desert, and the uncontrolled growth we have experienced during the last 10 to 15 years could not come to a good result in terms of water consumption. We should not put the blame of the politicians on the back of the Great Basin National Park.

Thank you for your thoughtful consideration.

Sincerely,  
Mrs. Vitoria Ferraro
